PROJECTS

Sorting Visualizer [↗](#) | [HTML](#), [CSS](#), [Bootstrap](#), [Javascript](#)

August 2023

- Create a dynamic sorting visualizer using HTML, CSS, Bootstrap and JavaScript. This project showcases various sorting algorithms through an interactive web interface. Users can observe the step-by-step process of sorting algorithms like **bubble sort, quicksort, and more**, enhancing their understanding of how these algorithms work in real-time.
- [Live site here](#)

Image Search App [↗](#) | [HTML](#), [CSS](#), [Javascript](#), [API](#)

July 2023

- Create an Image Search app using HTML, CSS, and JavaScript, leveraging the Unsplash API. Search for images, display results, and load more using the "Show more" button. A dynamic and user-friendly project to explore and showcase a variety of images from Unsplash's vast collection.
- [Live site here](#)

Portfolio Website [↗](#) | [HTML](#), [CSS](#), [Javascript](#), [Bootstrap](#)

June 2023

- Explore my personal portfolio website and delve into a curated collection of my projects and accomplishments.
- insight into my skills, expertise, and professional journey, all elegantly presented for your perusal.
- [Live site here](#)

TECHNICAL SKILLS

Languages: Java

Web Technologies: HTML, CSS, JavaScript, Bootstrap

Developer Tools: VS Code, Netbeans, Git, GitHub, Linux

COURSEWORK

- | | | | |
|--------------------------------|---------------------|--------|-------------------------------|
| • Data Structures & Algorithms | • Operating Systems | • DBMS | • Object Oriented Programming |
|--------------------------------|---------------------|--------|-------------------------------|

CODING ACHIEVEMENT & CERTIFICATIONS

- Solving over **150** problems over platforms like **LEETCODE** [↗](#) and **GFG** [↗](#)
- Successfully finished a Udemy course on HTML and CSS, gaining proficiency in web development fundamentals [↗](#)
